

ACCESS SOFTEK, INC

# Real-Time Fraud Control

Detect. Predict. Prevent.

Fraud is not just increasing, it is evolving. Access Softek's Fraud Control solution is evolving to defeat it. Powered by AI, Fraud Control protects the account by learning each user's normal digital behavior and reacting when out-of-pattern activity is detected for that user. Fraudsters are stopped in their tracks while real users authenticate with ease.

Fraud Control provides visualization and reporting tools to inspect fraudulent threats. Analyze individual sessions, report on suspicious activity, and fine-tune the system to establish the protection that's right for your institution.

## Features

- Fraud Control is unobtrusive—most users will never experience an interrupted workflow
- When a session is identified as risky, you decide whether to lock the account or simply reject the transaction
- Protects all sensitive areas of your digital banking solution
- Constantly learns from new and historical data
- Provides a score of risk for every session
- Continuously learns from admin feedback

For more information about how your credit union can engage members and non-members with this valuable resource, email [consult@myleverage.com](mailto:consult@myleverage.com).
