

Challenges we help solve

Employees lack clear paths for growth and development

Engagement declines without visible investment in learning

Retention suffers when learning is disconnected from performance

Employee learning and development program.

Your workforce is your organization's most vital resource.

As roles evolve and expectations rise, continuous learning becomes essential to individual growth and organizational performance. The Learning Center equips team members with the skills they need to grow in their careers while staying aligned with your business priorities.

Used by hundreds of organizations, The Learning Center enables targeted, competency-based development that supports both personal advancement and company-wide capability building. Whether deployed on its own or integrated with Performance Pro, it delivers a connected performance and learning experience.

Why The Learning Center?

- Connects learning directly to role expectations and performance goals
- Automates competency-based course assignments and progress tracking
- Offers a wide library of learning formats including microlearning, video, quizzes, and e-learning
- Provides a vast course library and resources tailored to organizational needs

Key Outcomes

- Support team members in developing skills that drive performance
- Strengthen your culture of professional growth
- Deliver competency-linked training programs
- Administer and monitor learning within your existing performance process

“

The modules are easy to navigate and it is great to help us gauge where our employees need additional training.

— **Annette S**, Employee Development Officer

”

Core Capabilities

Compliance Training

Access thousands of industry-standard courses across business, HR, IT, leadership, management, and sales, with automated due-date and status notifications

Customizable Learning Paths

Assign training to individuals or groups based on roles and skill needs

Flexible Learning Formats

Use microlearning, interactive video, quizzes, and e-learning modules to match team-member preferences
